

OFFICIAL TEAM KICKOFF

FIRST LEGO LEAGUE CHALLENGE

BIOGLOW™ · 2026–2027

Meet & Greet for students and families

FLL Founders Edition Challenge · SPIKE™ Prime

Tonight's goal: meet your team, understand the season, and answer any questions.

90 MINUTES TOGETHER

Today's roadmap

DISCOVER

The FLL experience

What students build, code, research, and present—and why Core Values guide every part of it.

WATCH

BIOGLOW kickoff

Meet this year's biodiversity theme and see the official season material in action.

TRY

Learn together

Quick LEGO challenges for students and families, followed by a first look at SPIKE Prime.

PLAN

Make the season work

Meeting rhythm, family support, official resources, questions, and next steps.

THE PROGRAM

What is FIRST LEGO League Challenge?

FIRST LEGO League is a team-based STEM program in which students use **research, engineering, coding, and communication** to tackle a shared challenge.

Teams learn to solve problems with curiosity, persistence, and respect for one another.

SPIKE Prime team

- Build and program an autonomous robot
- Explore a real-world biodiversity challenge
- Design and share an Innovation Project solution
- Practice presenting, teamwork, and reflection

WATCH FIRST

Welcome to BIOGLOW™

WHAT IS FLL?

About FIRST LEGO League

Watch: About FIRST LEGO League

A short overview of FIRST LEGO League for families and new team members.

3–5 MINUTE OPENER

Official season reveal

Watch: Introducing the 2026–2027 FIRST LEGO League BIOGLOW Season

Introduce the biodiversity theme and give families a shared picture of the season.

THE 2026–2027 SEASON

BIOGLOW™ is about biodiversity

Nature is full of connected systems. This season, teams explore **the vibrancy of the world's ecosystems** and ask how people, plants, animals, and technology can work together.

Our team's path: Founders Edition

Our current experience is built around **SPIKE Prime**, an autonomous Robot Game, an Innovation Project, and Core Values.

Official source: **FIRST Game & Season** · **BIOGLOW season materials**

A helpful update for families

BIOGLOW offers **Founders Edition** and **Future Edition** experiences. Availability, format, and timing vary by region.

Founders Edition Challenge is the relevant path for teams using SPIKE Prime.

ROBOT GAME SNAPSHOT

A rainforest field. Fifteen missions. One strategy.

MISSION DESIGN

15 rainforest missions

The Founders Edition Robot Game explores connections among plants, animals, and people.

MATCH PLAY

2½ minutes

The robot acts autonomously.
Teams choose which missions to attempt and in what order.

TEAM QUALITY

Core Values matter

Teams also demonstrate Gracious Professionalism during official Robot Game matches.

Start simple. A repeatable mission is more valuable than a mission that only works once.

Use the official Robot Game Rulebook and current updates as the source of truth for scoring, equipment, and match requirements.

OFFICIAL GAME RESOURCES

Watch, set up, then read the rulebook

Use it for	Official resource
Season overview	BIOGLOW Season Materials
Field orientation & scoring	BIOGLOW Missions Video (Founders Edition)
Building the official field	BIOGLOW Field Setup Video
Rules, updates & meeting guides	FIRST Game & Season Portal

Before the first robot build: **watch the field setup video and read the current rulebook together.**

THE WHOLE CHALLENGE

The four pillars of FLL

01

Core Values

Discovery, Innovation, Impact, Inclusion, Teamwork, and Fun guide how the team works.

02

Innovation Project

Research a biodiversity-related problem, create a solution, and share it with others.

03

Robot Design + Game

Engineer a dependable robot, explain the decisions behind it, and use it in the 2½-minute Robot Game.

Success is not only a score. It is a team that learns to make thoughtful decisions together.

TEAM CULTURE

How we will work together

GRACIOUS PROFESSIONALISM®

Do high-quality work with kindness

We treat teammates, volunteers, and other teams with respect—especially when things are difficult.

COOPERTITION®

Compete hard. Help everyone grow.

We share learning, celebrate improvement, and remember that other teams are fellow problem-solvers.

The golden rule: Students do the work. Coaches and families guide with questions, encouragement, logistics, and safety support.

OUR ROBOTICS PLATFORM

Meet SPIKE™ Prime

THE HUB

The robot's brain

- 6-axis gyroscope for heading and turning
- 5×5 LED light matrix
- Bluetooth and rechargeable battery
- Six ports for motors and sensors

MOTORS + SENSORS

The robot's body and senses

- Angular motors for driving and attachments
- Color Sensor for lines and markers
- Distance Sensor for measuring proximity
- Force Sensor for touch and control inputs

First mini-lab: connect the Hub, display a glowing image, and make a motor move when the Force Sensor is pressed.

BUILD THE RIGHT HABITS

Learn robotics in a repeatable loop

BUILD

Make one simple mechanism

Start with a stable driving base and one purpose at a time.

CODE

Write a small program

Use Word Blocks first; move toward reusable My Blocks and Python when ready.

TEST + IMPROVE

Collect evidence

Run the same test more than once. Record what changed and what the robot did.

Official skill-building path: **LEGO Education SPIKE Prime Competition Ready**

INNOVATION PROJECT

Turn curiosity into community impact

Step	What students do
Identify	Observe a specific biodiversity or ecosystem challenge.
Research	Learn from credible sources and people who understand the problem.
Design	Create, compare, and improve possible solutions.
Share	Gather feedback, refine the idea, and tell the story clearly.

Start with listening. A conversation with an expert, local organization, or affected community member can make a project more useful and more original.

A RHYTHM THAT BUILDS MOMENTUM

Weekly team schedule

ONCE PER WEEK

2.5 hours together

A steady meeting rhythm gives the team enough time to build, code, research, present, and clean up well.

A SIMPLE SESSION PATTERN

- 15 min: check-in and goals
- 45 min: robot build / code / test
- 45 min: Innovation Project work
- 25 min: share-out, documentation, and reset
- 20 min: team building or focused skill practice

FAMILY PARTNERSHIP

Adults make the team possible

KEEP US READY

Session support

Coordinate water and sign-ins.

OPEN DOORS

Project connector

Help the team meet people who understand ecosystems, conservation, research, or technology.

MAKE EVENTS WORK

Practice judge & logistics

Offer feedback during rehearsals and help with travel or equipment on event days.

The most valuable adult support removes obstacles so students can lead.

KEEP THESE CLOSE
